SELECTED WORK

01

Citadel

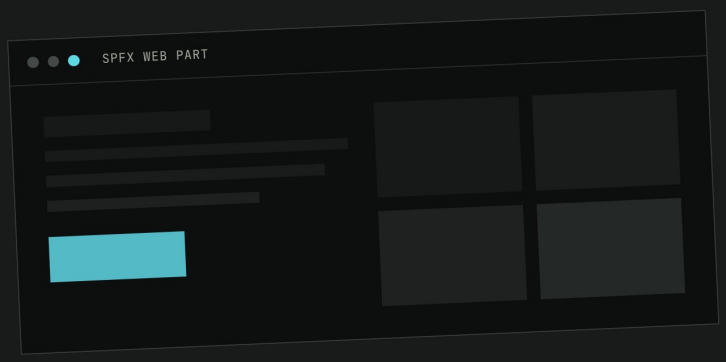

20+ CONTAINERS, ONE LOGIN

My home server: a second-hand IBM x3650 in my bedroom. Every service sits behind a Cloudflare Tunnel and single sign-on, so nothing is exposed directly.

Built with Claude and locally run models as my sysadmin

I'm learning Linux by reading what it did and why. I run the AI side myself with LM Studio and llama.cpp. I self-host because I believe the internet should stay free and open, the way it was before I was born, and running my own stack is how I put that into practice.

Self-hosting · SSO · Linux

02

PLACEMENT · ONGOING

Barnsley Hospital NHS

Junior Applications Developer with the ICT Applications Development team. I work on SharePoint Framework web parts in TypeScript and React, and use GitLab day to day.

SPFx · TypeScript · React · GitLab

Internal work, so no public repo or demo.

03

FIRST PROJECT · IN PROGRESS

This site

Rebuilt from scratch in React and TypeScript. It's my first proper project, and I'm learning the tooling by building it.

DaisyUI	COMPONENTS
Tailwind CSS	STYLING

React + TypeScript APP

Vite BUILD TOOL

GitHub ↗

Skills

LANGUAGES	TypeScript, Python, C# (MVC)
FRAMEWORKS	React, Next.js, SPFx, Tailwind CSS, DaisyUI, Bootstrap
TOOLS	Git, GitLab, GitHub, Vite
LEARNING NOW	C++, WinAPI, Kernel development, Linux

ux ◆ C++ ◆ WinAPI ◆ Kernel ◆ Li

About

I like understanding a system well enough to break it, then building it so it holds. I'm aiming at backend engineering with a systems and security lean: the layer most people never see.

NEXT · SEPTEMBER 2027

Degree apprenticeship

After Barnsley College.

NOW · UNTIL DECEMBER 2026

Junior Applications Developer, placement

ICT Applications Development, Barnsley Hospital NHS Foundation Trust.

NOW

T Level in Software Development

Barnsley College.
